Tous ces types de pots d'échappement peuvent être montés horizontalement ou verticalement. Déterminer le modèle désiré en se référant aux caractéristiques du tableau ci-dessus. Les longueurs E et G peuvent être raccourcies.

COUVERCLES PROTECTEURS

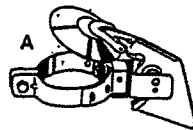

Adaptable au tuyau d'échappement. Se soulève dès la mise en marche du moteur. Protection efficace contre la pluie, l'humidité ambiante et autres agents destructeurs.

POUR UNE DEPENSE MODIQUE!

Halte aux dégâts causés aux moteurs par l'humidité ambiante qui pénètre par le tuyau d'échappement (un tuyau recourbé ne protège pas...) En outre, un "RAINCAP" refermé conserve des gaz tièdes dans le collecteur, ce qui favorise le démarrage à froid et soulage batterie et démarreur.

TYPES "A" SUPER RAINCAP

5870/01	Ø 32-35 mm.
5870/02	Ø 38-40 mm.
5870/10	Ø 43-50 mm.
