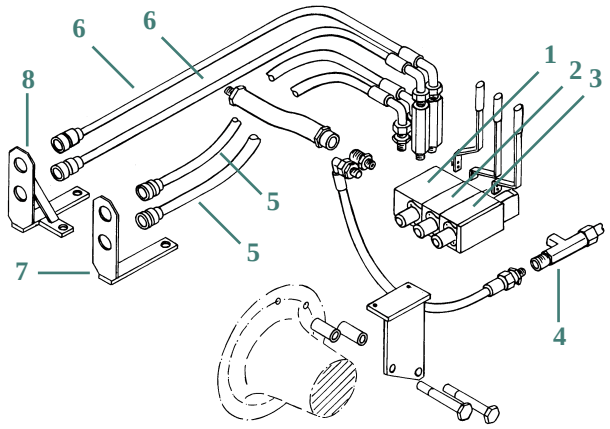
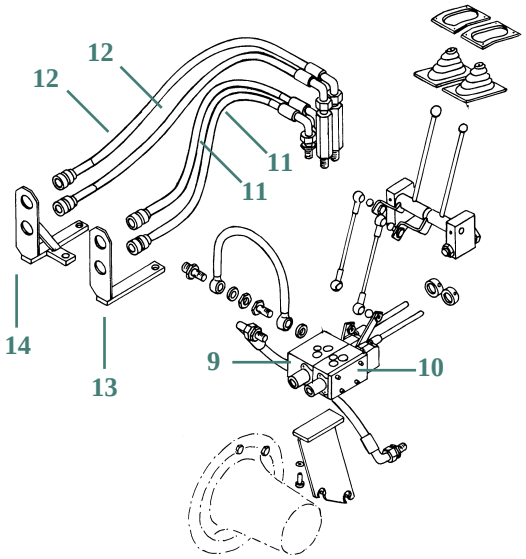
DISTRIBUTEURS HYDRAULIQUES "TILL"
"TILL" HYDRAULIC VALVES

Spécialement conçus pour les tracteurs "John Deere" à circuit hydraulique à centre fermé. Ils sont commutables en simple et double effet. (Simple effet, débit par la sortie "A", double effet, débit par les sorties "A" et "B"). Les leviers de commande peuvent être rapidement disposés soit en retour automatique, soit en encliquetage à 3 positions. Ces distributeurs se montent à l'emplacement prévu sur le tracteur (interface). Ils sont robustes et d'une étanchéité parfaite. Leur nombre d'éléments peut varier de 1 à 3.





These valves are specially tailored to suit the "John Deere" closed center hydraulic system. They can be easily switched to the single acting position (Port "A") or to the double acting position (Port "A" and "B"). The operating levers can be quickly displayed on automatic return or in 3 positions range. These valves are ready to fit on the interface position on the tractor body. They are robust and fit perfectly. Two additional slices can be filted on.
